

Principles of AI Engineering

Exercise 11

Prof. Dr. Steffen Herbold

Author: Lukas Schulte

Project task

While you were working on the implementation of the application, new data became available. Re-train your model using the new data set (`sample2.csv.gz` in StudIP) and data from your own database. Then include the updated model in your application.

Questions

1. Describe techniques for releasing the new model. Mention advantages and disadvantages.
 - Rolling Release
 - Blue-Green Deployment
 - Canary Release
 - Feature Toggles
2. Create a model card for the problem description, use the example from the lecture.
